DETAILED ACTION

The requested change of one inventor's name sent April 9, 2005 has not yet been processed, but the examiner will attempt to expedite that process. The IDS submitted July 21, 2005 is acknowledged. Claims 1-33 are pending, following the preliminary amendment of July 9, 2004.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Group I, claim(s) 1-20 and 24-28, drawn to a product, one process of making, and one use of that product, wherein the special technical feature is a fluorogenic protease substrate peptide doubly labeled via thiol groups with an alkyleneamidotetramethylrhodamine group.

Group II, claim(s) 21-23, drawn to the second product, whose special technical feature is a fluorogenic substrate comprising a peptide doubly labeled with the same rhodamine derivative, wherein the two labels, & their linkages are substantially isomerically identical.

Group III, claim(s) 29-30, drawn to a kit, wherein the special technical feature is the combination of the fluorogenic substrate described in claim 1 and a standard protease.

Group IV, claim(s) 31-32, drawn to the third product, whose special technical feature is the fluorogenic substrate described in claim 1 which is immobilized.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

37 CFR 1.475(b)(2) states (in part) that

Art Unit: 1655

"(b) An international application or a national stage application containing claims to different categories of invention will be considered to have unity of invention if the claims are drawn only to one of the following combinations of categories: ... (2) a product, a process specially adapted for manufacture of said product, and a use of the said product".

The instant claims contain independent claims to four Products, one Process of Making, and one Use, so Unity of Invention is lacking. 37 CFR 1.475(d) further states:

"If multiple products, processes of manufacture or uses are claimed, the first invention of the category first mentioned in the claims of the application and the first recited invention of each of the other categories related thereto will be considered the main invention in the claims, see PCT Article 17(3)(a) and § 1.476(c)."

Therefore, restriction is required.

A telephone call was made to Mr. Patrick Hagan on Oct. 25, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher Bull whose telephone number is (571) 272-1327. The examiner can normally be reached between 8:30-5.
